The VFX Supervisor Daily

FRIDAY 13 NOVEMBER 2026

Camera-mounted capture and supplier upheaval could change how you bid

Swipe for the stories →

UPDATE: MANTIS PUTS DEPTH CAPTURE ON THE CAM...

Hexagon Mounts a LiDAR on the Cinema Camera Itself to Kill VFX's Costliest Bottleneck

techtimes.com

So what: Claims a per-frame spatial record and Alembic output feeding Unreal, which could trim matchmove cost and LED-stage calibration work if it holds up

UPDATE: MANTIS PUTS DEPTH CAPTURE ON THE CAM...

Hexagon's New Mantis On-Set 3D Capture System for VFX

• postperspective.com

So what: Confirms the launch and the standard EXR, FBX and Alembic outputs, so it should slot into existing pipelines without a rebuild

UPDATE: GEDEON MEDIA'S ASSETS LAND WITH AUTE...

Autentic acquires Gedeon Media's assets and sets up new studio arm

• c21media.net

So what: A sign that buyers are consolidating failed European producers; if you pitch to such outfits, expect new owners and smaller teams

STUDIO OWNERSHIP AND SPACE

Could Elstree Film Studios be put up for sale?

• tvbeurope.com

So what: The council says continued investment is not sustainable and alternative uses are on the table, so UK stage availability at Elstree is worth watching

SUPPLIER AND PLATFORM RISK

Vizrt acquires digital broadcast titling and graphics systems company Chyron

• tvbeurope.com

So what: Suggests broadcast tooling is consolidating around AI platforms, which may bring new workflow demands if you do live or graphics work

WHO DID WHAT ON CURRENT SHOWS

Female leadership in VFX for action-crime series Neagley - behind the scenes with WeFX

• britishcinematographer.co.uk

So what: A Toronto vendor delivered more than 250 shots with about 70 artists in eight months, a useful benchmark for mid-size episodic scope

WHO DID WHAT ON CURRENT SHOWS

Below: Matt Glover (Production VFX Supervisor) and Annie Godin (Production VFX Producer)

• artofvfx.com

So what: Shows a lead vendor taking about two thirds of a show, with smaller shops brought in for CG fire and overflow when the schedule tightened

WHO DID WHAT ON CURRENT SHOWS

How Ludo Studio Made 'Allen': Gecko Smiles, Eight Puppets and an Animatronic That "Didn't Fly"

• whats-on-netflix.com

So what: A full animatronic failed a test with Netflix and the team switched to puppets, a reminder that practical creature routes can still win

On-set depth capture is moving closer to the camera, which may change what you quote for matchmove.
